

# Getting to know and manage your soils

A workshop for landholders wanting to reduce erosion and build practical skills

*This 1-day practical workshop explains how to protect soils when planning, constructing and maintaining property infrastructure.*

**WYCARBAH, 28 August 2017**

Venue: Wycarbah Hall

Time: 8.30am - 4.30pm

RSVP: Janeen Whiting  
E: [admin@capcatchments.org.au](mailto:admin@capcatchments.org.au)  
P: 4921 0573

**BYO: Chair**

**Cost: Free**

**Lunch and drinks provided.**

## About the presenters

**John Day** from Burnett Mary Regional Group brings industry best-practice 'know-how' on everything from contour bank construction to maximising water filtration. Formerly a Soil Conservation Advisor to DPI and DNRM, John focuses on establishing sustainable production systems with practical strategies for your property.

**Darryl Hill** is highly regarded around Australia for his practical approach and expertise using graders and other machinery to achieve soil conservation outcomes. With over 40 years study and on-ground experience, Darryl's teachings are aimed at achieving safe, effective and low-maintenance construction.

## Key learnings

- How to identify soil types, limitations and risks to soil integrity.
- How to avoid and mitigate erosion on fence lines and access tracks.
- How to limit soil and silt loss during extreme weather events.
- How to treat flood-related washouts and erosion to restore agricultural productivity.
