

**When: Friday 23 April 2021
8.30am to 3.00pm**

South West Queensland Dung Beetle Field Day

What:

The Sargood's of 'Halton' Station have successfully introduced and sustained a healthy population of dung beetles on their property. They are keen to share their success with other producers to ensure ongoing breeding and expansion of dung beetle populations through Western Queensland.

Where:

'Halton' Station—
approx. 45 km east of
Charleville on the
Charleville Morven
Highway.

Register via:

darryl@qwalc.org.au

Enquiries:

Darryl Ebenezer -
0407 696 792

Who:

The Field Day will include professional speakers on:

- 🌐 Dung Beetles Past, Present, Future - breeding and introduction as well as on-property demonstration of how to introduce and grow your dung beetle herd to ensure they thrive.
- 🌐 Landcare Farming – the next decade.
- 🌐 The Australian Sustainable Beef Framework
- 🌐 Rehydrating the Landscape

Catering: Morning tea & lunch provided—*please advise of any special dietary requirements when registering.*
