

Grazing fundamentals EDGE

Roma, Qld: Wednesday 18th August 2021

VENUE Roma Saleyards Cafeteria, 44589 Warrego Highway, Roma

TIME 8:30am to 4:30pm

Grazing fundamentals EDGE is a workshop designed to give you a broad understanding of the components of the grazing production system and the core, scientifically-backed principles behind optimising grazing land productivity.

Attending this workshop will help you to:

- understand what conditions drive pasture growth and how you can use strategic grazing management to improve pasture productivity
- evaluate the productive potential of a property and identify opportunities for improvement
- better align herd management with seasonal changes in pasture condition
- build a seasonal climate profile for your location
- understand key considerations when designing paddock and property layout.

What you will learn

- environmental regulators of pasture growth and quality
- seasonal pasture growth patterns and key decision dates
- how soil properties influence pasture growth
- how grazing affects pasture plants, their productivity and growth
- how to assess land condition and how this impact on carrying capacity
- know when and how to use pasture spelling
- principles behind successful grazing systems
- how to account for different classes of animals when assessing grazing pressure
- what's involved with forage budgeting and calculating carrying capacity.
