

PASTURES IN THE BURNETT MARY REGION : WEBINAR

By understanding how grasses grow and what grass species dominate your pastures you can make better grazing management decisions. In this webinar **Jill Alexander, Applied Ag**, will step through some basic plant physiology and will show you how to identify key indicator grasses common in the Burnett Mary region. This webinar will be hosted once:

Wednesday, 29th July, 1pm—2pm

This event is funded through the Queensland Government Reef Water Quality Program

This webinar
will cover:

Environmental
regulators of
grass growth

-

What grasses
can tell you
about a
paddock

-

Key indicator
species
