

## Are you interested in making informed and profitable decisions in your beef cattle business?

Join economists Tim & Daisy to help you take the guess work out of your decision making and learn how to test the options available to your business to improve profitability.

### What you will get out of this workshop:

- Practical examples of how to test management options & how to get these answers for yourself
- When to sell and when to feed
- Optimum herd productivity
- Cost vs benefit analysis
