# Remote Livestock Management System - Field Days

If you've ever thought of installing a remote livestock management system these field days are for you.

During these half-day sessions, you will hear from Tim Driver, the inventor of the walk over weigh (WOW) system, a property owner who has been successfully using the system for years (Murray Grey) and a local who is new to the technology. This event is a great opportunity for you to learn everything there is to know about the WOW system and have all your questions answered.

## Learn how to:

- ✓ Use the WOW system to monitor your livestock
- ✓ Better manage your cattle and grazing land using WOW data

Plus, find where TRU-TEST technology could take the Australian cattle industry next.

**Tuesday, 27 Nov, 2018**  
**8:30am – 3:30pm**  
**'Barnett'**  
 North of Blackwater  
 Bedford Weir Rd

**Wednesday, 28 Nov, 2018**  
**8:30am – 3:30pm**  
**'Old Good Hope'**  
 West of Springsure  
 Cona Creek Rd

**TIM DRIVER**  
**WOW Inventor**

Tim has worked extensively in developing remote livestock management systems, capable of identifying, weighing and drafting individual animals.

**MURRAY GREY**  
**WOW long-term user**

Murray is a 5th generation pastoralist from Western Australia who has been using WOW technology, for a number of years, to manage his properties better.

**FREE EVENT**  
 Morning tea and lunch provided.  
 Please BYO chair, hat, water bottle & sunscreen
