

What's Your Plan?

Building Business Resilience

Drought and hard times are a reality for primary producers. Southern Queensland Landscapes, Rural Solutions Queensland, QRIDA, and the Department of Agriculture and Fisheries invite you to join us for an interactive workshop to improve the resilience of your grazing enterprise.

These free workshops will cover:

- Evaluating the risks to your business
- Developing and documenting ways to mitigate risks
- Best practice management and innovations in grazing
- Steps to developing your Business Plan
- Grants and loans currently available through QRIDA
- And more!

Come along and meet fellow producers from your region, share ideas and talk all things grazing.

Workshops will run from 8:30am (for a 9:00am start) to 3:00pm, with morning tea and lunch provided.

GrazingFutures Livestock Business Resilience improves drought preparedness and viability of Queensland livestock producers and is jointly funded by the Australian Government's Future Drought Fund and the Queensland Government.
