

Grazing Fundamentals

Climate - Land types - Grazing management

A workshop that looks at the local influences on pasture yield and quality and how you can use seasonal planning and strategic management to maximise productivity.

We will cover subjects such as:

- The environmental factors that regulate pasture growth and quality
- Feed-year planning
- How to work out carrying capacity
- Basic principles behind successful grazing systems
- Local pasture growth patterns
- How soil type influences pasture growth
- Land condition

This is an MLA EDGENetwork© pilot workshop

When: Thursday, 18th February

Where: Myall Youth and Community Network Centre, Cnr Warrego Highway & Nicholson St, Dalby
