- See** tools and resources in action
- Network** with like-minded producers

TOPICS COVERED:

Soil Health | Grazing Land Management | Animal Production
Animal Health & Welfare | People & Business

Grazing BMP is a proven, free, and voluntary tool to assess how well your grazing business is being run, and to pinpoint what you can do better, and to give you tools to improve.

This is what graziers at previous OBE Organic Grazing BMP Forums have said:

“Highlighted a lot of issues we hadn’t prioritised before.”

“Focused on highly relevant issues.”

“Learnt lots.”

“Very well organised. Covered a wide range of topics and very informative.”

“Very relevant to our operation.”

Grazing BMP is for all producers – conventional and organic. Any cattle grazer wanting to learn and improve should attend. OBE Organic is proud to support Grazing BMP because as a 100% farmer-owned company, we want to build the long term profitability of all cattle producers. This event is sponsored by MLA and the Queensland Government Building Drought Resilience Project.

* Registration includes refreshments at Forum. Accommodation and additional meals are not included. Producers need to book their own accommodation.
