

# Biosecurity Planning Workshop

BROUGHT TO YOU BY LIVESTOCK BIOSECURITY NETWORK, GULF CATTLEMAN'S ASSOC,  
ETHERIDGE SHIRE COUNCIL AND DAF.

**FREE**

## MARKET ACCESS/BIOSECURITY PLANNING WORKSHOP

An on-farm biosecurity planning workshop aimed at maintaining market access to the Northern Territory and Western Australia & keeping the present J-BAS score of 7 after June 30, 2017.

Session Information: This session will provide Queensland producers with templates and information on how to design a biosecurity plan that is specific for their property to continue to trade with NT & WA markets. Topics will include information on pest management, disease management and basic biosecurity priorities including Johne's Disease.

2017

9am - 4pm

Morning tea & lunch  
Kindly supplied by DAF

RSVP Wednesday  
May 31, 2017

Presented by

Rachael O'Brien

### Background:

In 2016, Queensland reduced Johne's disease regulation in favor of an industry led market driven approach. In February 2017, the Northern Territory legislated minimum entry requirements of Johne's Beef Assurance Score (JBAS) of 7 for all cattle moving in to the NT.

Until 30 June, all Johne's disease-free properties in QLD are JBAS 7. However, from 1 July 2017, all QLD properties that fail to implement a biosecurity plan will fall to the lowest level of assurance JBAS 0.
