AN INITIATIVE OF THE BURNETT MARY REGIONAL GROUP

Electric Fencing

Technology Workshop

Are you interested in learning about the latest electric fencing technology?

Workshops will be presented by **Paul Thomson of JVA Technologies**

Engineer and founder of Pakton Technologies (est. 1995) which is recognised by the electric fencing industry as a research and design leader in electric fence electronics.

The workshops will cover:

- Electric fencing basics:
 - The essentials of electric fencing,
 - Energiser basics – how they power the fence,
- What's new in electric fencing (product demonstration),
- Time savings, peace of mind and security:
 - Internet connectivity
 - Monitoring from a distance via computer and/or phone (ie. remote monitoring)
 - Phone apps and 'the cloud'
 - Old fence: new tricks
 - Bonus features - auto-sync technology.
- Flexible fencing options to better facilitate rotational grazing and spelling for improved land condition; and
- Details and features of the latest equipment.

Financial support for equipment and on-one assistance is available to graziers to improve grazing practices

**Eligibility Criteria and conditions apply.*

Workshop 1: Tuesday 24 October, 9am-11:30am @ Wondai RSL
Workshop 2: Thursday 26 October, 9am-11:30am @ Mundubbera MCDA

Morning Tea provided

Further info: Marisa Young on P: 0439 032 253 or E: marisa@betterburnett.com

RSVP: Friday 13 October 2017 to Melinda on P: 4166 3898 E: admin@burnettcatchment.org

This project is an initiative of BMRG funded through the Australian Government's National Landcare Programme. The project is coordinated locally in the inland Burnett by BCCA.
