

STOCKTAKE WORKSHOP

Getting through the dry

Balancing supply and demand

LANSDOWN RESEARCH STN, WOODSTOCK

Wednesday 21 February 2018

RSVP by: Friday 16 February 2018—(07) 4761 5150

Do you want to know how to manage your pasture through the dry season for best livestock production ?

The hands on “Stocktake” **workshop** will give you the tools to balance your available pasture with animal demand.

Learn how to:

- ◆ assess land condition (paddock-based assessment that recognises different land types)
- ◆ monitor grazing land for ecosystem health and long-term paddock productivity
- ◆ manage and interpret data for business planning
- ◆ quantify the potential for improved productivity
- ◆ Calculate forage budgets
