

# 'CREATING A VALUE ADDED FUTURE'

Maranoa women, come join Helen Everingham to look at the things that you value, the things that are important to your way of living, to set you up for the life you wish to lead.

What do you want to take into your future?  
What are those things that you want for your family?  
And how can you implement those values and standards?

Much as we may wish for it, the world is not going to change. We work with our world as it is today, ensuring that we have the coping skills for whatever life may throw at us.
