

Pasture dieback information meeting

Pasture dieback over the past 2 years has significantly affected pastures in coastal Queensland. Dieback in Buffel grass pastures in Queensland has also been a problem over a number of years.

This meeting will give information on:

- recognising pasture dieback
- grass species affected
- current research projects carried out by Meat & Livestock Australia (MLA)
- likely causes
- strategies being developed to deal with the problem.

Where: Boonah Golf Club
Date: Wednesday 31 October
Time: 6.00pm to 8.00pm
Tea & coffee provided
