SOIL HEALTH WORKSHOP

Soils for success

PRACTICAL WAYS TO MANAGE YOUR SOIL

Graziers and growers are invited to join these free soil pit workshops to learn hands-on ways to improve their soil.

How to:

- ✓ Assess and improve the health of your soil
- ✓ Use tools to measure your soil's health
- ✓ Increase production and reduce run-off
- ✓ Make your land resilient against weather events

About the world renown presenters:

Nicole Masters
Founder/Director Integrity Soils

Nicole Masters has a background in ecology, soil science and organisational learning. Nicole has been providing agricultural consulting and extension services since 2003 and is recognised as a knowledgeable speaker on the topic of soil health.

Terry McCosker
Founder/Director RCS

Terry McCosker is one of the great innovators of Australian agriculture and is considered, by some, as the most trusted source of farming knowledge in Australia. With over 45 years of experience, Terry is an expert in managing soil nutrients to improve land health and business profitability.
