Hughenden

### WHEN

Tuesday 18 June  
8:30am - 4:30pm

### PRESENTER

Stuart Andrews,  
Tarwyn Park Training

*Morning tea and lunch provided*

### ***Working with your landscape to boost productivity***

**Natural Sequence Farming (NSF)**, developed by Stuart's father, Peter Andrews, is a rural landscape management technique aimed at restoring natural water cycles that allow the land to flourish despite drought conditions. NSF offers a low-cost, widely applicable method of reducing drought severity and boosting productivity on Australia's farms and landscapes. The technique is based on ecological principles, low input requirements and natural cycling of water and nutrients to make the land more resilient.

Please bring a chair.

### **RSVP REQUIRED BY WEDNESDAY 12 JUNE:**

Anne Alison  
Rangelands Officer
