Soil Erosion Control Workshops

Learn how to protect your soil

With guest presenters Darryl Hill and Bob Shepherd

WHERE & WHEN:

Boomarra Station, Cloncurry

24 June, 8.30am – 3.30pm

Kynuna Station, McKinlay

26 June, 8.30am – 3.30pm

Dunluce Station, Hughenden

28 June, 8.30am – 3.30pm

Morning tea and lunch provided.

Key learnings will include:

- How to identify soil types, limitations and risks to soil integrity
- How to avoid and mitigate erosion on fence lines and access tracks
- How to limit soil and silt loss during extreme weather events
- How to treat flood-related washouts and erosion to restore agricultural productivity
- How to manage and recover flood damaged grazing land

Guest speaker Darryl Hill is highly regarded around Australia for his practical approach and expertise using graders and other machinery to achieve soil conservation outcomes. With over 40 years study and on-ground experience, Darryl's teachings are aimed at achieving safe, effective and low-maintenance construction.

Guest speaker Bob Shepherd who specialises in grazing land management rehabilitation and soil conservation will open the workshop with a presentation on 'Managing Flood Damaged Grazing Land'.

RSVP REQUIRED BY 14 JUNE:

Pru Wharton

Regional Agricultural Landcare Facilitator
