

Invitation Tropical pasture field days 2020

Tuesday, 10 and Wednesday, 11 March

Barenbrug is pleased to invite you to visit one of our major research and extension sites in northern Australia.

To be held at the Kingaroy DPI Research Facility, we are hosting a series of tours which offer the opportunity to inspect our product range first-hand, view extension and development work currently being undertaken at the facility and to learn more about our range of tropical grass and legume species.

The open days will be an excellent opportunity to see many of our varieties in the flesh, with an opportunity to receive real time, on the ground product training, advice and guidance around the stewardship of our products.

In between tours, we'll also be providing morning tea and lunch and we'd love for you to join us.

To assist with catering please **RSVP by Thursday, 5 March** to your local Barenbrug Territory Manager.

We look forward to seeing you there.

Program

To help with planning, the site tours will be held at set times across both days:

Tuesday, 10 March

9.30am | 11.00am

1.30pm | 3.30pm
