

EROSION & WHOA BOY WORKSHOP

5 March | Mundubbera

A workshop that will provide practical techniques to reduce soil erosion on your farm

WORKSHOP DETAILS

9:30am—2:30pm

“Reece Park”
110 Greentree Lane
BEERON via Mundubbera

Morning Tea & Lunch Provided

Please bring:

- ⇒ chair
- ⇒ water
- ⇒ hat
- ⇒ sunscreen
- ⇒ closed in shoes

RSVPs essential by 03 March to

- ⇒ admin@burnettcatchment.org
- ⇒ 07 4166 3898

Topics include

- Practical skills in surveying water management structures (in particular whoa boys) on farm tracks—attendees will have the opportunity to use the surveying equipment
- Practical demonstration on the construction of whoa boys with machinery equipment
- Strategies and techniques to reduce soil erosion and subsequent loss of production over a property
- Description of a number of locally successful soil erosion rehabilitation techniques

Guest Speaker - Darryl Hill

Darryl is highly regarded around Australia for his practical approach in achieving soil conservation outcomes. With over 40 years of experience as a machinery operator and soil conservationist, Darryl will demonstrate techniques that will help to better manage erosion on your farm tracks, fire breaks and fence lines.

Guest Speaker—John Day

John is an experienced soil conservation adviser. During this workshop, John will provide a copy of the publication “Gully Erosion, Options for Prevention and Rehabilitation” and discuss erosion control and aspects of soil types and productivity.

This event is supported by the Burnett Catchment Care Association through funding from the Queensland Government Reef Water Quality Program.
