Phosphorus management in CQ

Develop a P management plan for the cattle on your property

Is Phosphorus nutrition a problem for your cattle?

Mon 16th Nov – Gin Gin RSL Hall

Tues 17th Nov – Mt Larcom Community Hall

Wed 18th Nov – Barmoya Henderson Park Farm Retreat

Thurs 19th Nov – St Lawrence Broadsound Centenary Hall

8:30 am – 1 pm NO COST

This workshop will help you to manage Phosphorus nutrition on your property by developing a management strategy. Topics covered include:

- Identifying P deficient country,
- Testing for deficiencies in cattle,
- P deficiency in breeders and growing steers,
- Supplementing P in the most economical way

The Phosphorus team:

Mick Sullivan (DAF) Mick is a Beef Extension Officer with extensive experience in beef cattle breeding and genetics, nutrition, grazing management and beef business analysis.

Kylie Hopkins (DAF) Kylie is a Beef Extension officer with a broad knowledge of grazing land management and pasture and forage production systems.

FREE - no cost

We will supply:

- Smoko and lunch
- Land type maps
- Lick assessments
- Lick intake calculator
- Workshop notes

Please bring:

- Labels from P lick products you are currently feeding
- Information on P lick intakes

RSVP:

Monday 9th November

Register online at:

<https://phosphorus2020.eventbrite.com.au>

or contact Kylie: 4843 2615

kylie.hopkins@daf.qld.gov.au

To have a land type map produced for your property (to help identify P deficient areas) please provide us with your lot on plans at registration.

Queensland Government

The Department of Agriculture and Fisheries Reef Grazing Extension Services are funded through the Queensland Government Reef Water Quality Program.
