

Building Grazing Business Resilience

Hard times will occur again.

Let's improve our business' resilience by creating a plan, today.

Healthy Land & Water, Rural Financial Counselling Service, QRIDA, and the Department of Agriculture and Fisheries invite you to join us as we discuss:

- Evaluating the risks to today's grazing business
- Developing and documenting risk mitigation strategies
- Best practice management
- Queensland's new drought reform measures
- Grants and loans available through QRIDA

This free workshop will provide information and resources on Queensland's new drought reform measures, including low and no interest rate loans, and how Farm Business Resilience Plans are a key requirement for accessing drought preparedness grants and assistance.

GrazingFutures Livestock Business Resilience improves drought preparedness and viability of Queensland livestock producers and is jointly funded by the Australian Government's Future Drought Fund and the Queensland Government's Drought and Climate Adaptation Program. This activity is also supported by Healthy Land & Water through the Queensland Government's Natural Resources Investment Program.
