Biosecurity Management Plan

Maranoa Regional Council invites land managers and our communities to participate in consultation workshops for the preparation of the Biosecurity Management Plan 2023-27.

The Plan will address weeds, pest animals and disease risks, including setting objectives and management strategies for the next four years. The Plan outlines Council and land manager responsibilities.

Workshops

Council wants to hear from land managers and communities about your current issues and have input into management strategies.

- Weeds
- Pest Animals
- Disease risks
- Information and extension
