

# Farm Business Resilience Program

## Interactive Worm Management Workshop

Join the Department of Agriculture and Fisheries and **Dr Noel O'Dempsey** for an interactive question and answer workshop.

Learn how to control worms in your **SHEEP, GOATS OR CATTLE** using practices that reduce the need for drenches and help combat drench resistance.

Noel is a veterinarian and an accredited WormBoss presenter who runs fine wool sheep and prime lambs between Texas and Inglewood. It is here at 'Linallie' that Noel uses his extensive technical knowledge and experience to manage worms and worm resistance in his flock. He has a wealth of knowledge that he can draw on to answer your questions.

**Please note workshops are capped at 25 participants, with no more than 2 attendees per business.**
