

# Cattle, carbon and sustainability

Join us at Brian Pastures to discuss diversifying your cattle business through carbon farming.

This workshop is designed to help graziers make an informed decision about carbon farming and will cover:

- carbon sources and sinks
- emission baselining — how to calculate your farm footprint
- reducing emissions on farm
- carbon projects and the associated legalities
- market signals — is the market ready for carbon-reduced products?

Hear from experienced presenters and facilitators:

Josh Peart (Grazing Scientist, DAF), Christophe Bur (Director, Quentic and Climate Active certified consultant), Kylie Hopkins (Beef Extension Officer, DAF) and Mick Sullivan (Principal Beef Extension Officer, DAF).

This event is funded by the Queensland Government's Drought and Climate Adaptation Program as part of the Farm Resilience program, the Grazing Extension Support (Reef) program, and the Department of Agriculture and Fisheries' Method to Market project.
