

ParaBoss is Australia's premier source of independent information about management and control of parasites in cattle, goats and sheep.

The ParaBoss extension team are developing a one day workshop that will help cattle producers manage parasites in their livestock in accordance with best practice principles.

You are invited to attend a pilot workshop which will discuss:

- Main parasites of cattle in Australian cattle herds, including the life cycles, impacts on livestock of:
 - » Worms
 - » Cattle, bush and paralysis tick
 - » Buffalo Fly
- Effective control of parasites
- Choosing products to control parasites
- Best practice application of parasiticides
- Managing and avoiding chemical resistance – including rotation, application, genetic solutions etc
- Integrated parasite management
- Biosecurity

The workshop will assist you with developing an integrated parasite management plan for your cattle operation, which you will be able to take to implement on your property.

There is no cost to attend the workshop. By attending the pilot workshop, we will ask you for detailed feedback on the content, to help us refine the workshop to meet industry needs. Your feedback will be treated confidentially.
