

Farm Business Resilience Program

Free workshop to build business resilience for drought

What's your plan?

Drought and hard times are a reality for primary producers. Southern Queensland Landscapes, Rural Solutions Queensland, QRIDA, TRACC, NACP and the Department of Agriculture and Fisheries invite you to join us for an interactive workshop to improve the resilience of your grazing enterprise.

This free workshop will cover:

- the Farm Business Resilience Program
- evaluating the risks to your business
- developing and documenting ways to mitigate risks
- steps to developing your business plan
- grants and loans currently available through QRIDA.

Come along and meet fellow producers from your region, share ideas and talk all things grazing.

Bollon – Tennis Club

Thursday 13 June 2024

Register via:
