Vets**

Queensland Government

Come and listen to speakers from Industry and Veterinary science, over two days covering sustainable pastures, regenerative grazing land management, pasture management tools, animal nutrition, breeder management, drivers of profitability and practical demonstrations.

Ask questions on regenerative grazing and beef industry sustainability matters.

There will be lunch and smoko provided and a dinner at end of day one.

This project is part of the Atherton Tablelands Intergrated Collaboration funded through the Queensland Government's Queensland Reef Water Quality Program and Sustainable Table.
