This workshop will help you:

- Prepare livestock schedules
- Calculate key herd performance indicators
- Prepare herd and cash flow projections
- Assess livestock trading opportunities
- Evaluate market options e.g. bullocks v feeder steers
- Analyse breeder herd structure and culling strategies

Breedcow Dynama is a software package developed to help graziers identify the most profitable way to manage their beef herd. Workshop attendees will have an opportunity to build a model of their own herd and test some scenarios for change.
