

**All your hard work
in the paddock
comes to nothing if
the business itself
needs attention...**

Your herd is the engine of your business, but like all engines, it needs a skilled driver and a stable vehicle.

Your herd may be one of the best and you have every reason to be proud of it.

Can you have the same confidence and pride in your business?

Just as you have acquired the skills to manage your herd and property, you need to acquire the skills to manage and direct the business so that it will provide for all of your family's needs and aspirations into the future.

The best beef businesses do this when the owners pay as much attention to the business as the herd.

BusinessEDGE
workshop *for beef producers*

WHY THIS WORKSHOP IS IMPORTANT

The recently released Northern Beef Report found that there is wide variation in business performance and that opportunities exist for most beef businesses to improve long-term performance.

The BusinessEDGE workshop will provide the necessary business skills to understand and improve business performance.

- ✓ Determine if your business is economically sustainable in the long term, and if not, what to do about it.
- ✓ Prepare and understand key financial information for your business.
- ✓ Determine if your herd is performing as it should.
- ✓ Determine if your debt is creating, or destroying, wealth and how much your business can afford.
- ✓ How to rationally allocate capital expenditure projects so that asset values, profits and cash flows improve over time.
- ✓ Provision and plan for succession and retirement so each event is fully funded.
- ✓ Determine if all the family needs and aspirations can be funded by the business.

And so much more ...
