

Northern Muster newsletter index list

Issue 37 April 2015 (PDF 5.6 MB)

- Qld leads way with record beef production: cattle prices keep heading upwards
- Expo kicks off busy beef industry calendar for 2015
- Species compete: growth of 3P grasses impacted where couch dominates
- Spyglass eyes key to managing soils: digital soil mapping
- Pregnancy performance: tips on improving reproductive outcomes in northern beef herds
- Weighing up issues around liveweights: multiple factors at play in arriving at accurate readings
- Forage budget: it's simple with Stocktake: estimating pasture yield
- Methane and the N factor: nitrate under study as alternative to urea: feed supplement research
- Crunching the numbers: Northern Gulf project offers help from broad base of industry specialists \$avannaPlan-BeefSense
- Soil carbon content study reveals no significant differences between sites
- Speakers delve into reproduction issues: Cash Cow project presents key research findings
- Enhancing MSA's value in supply chain: providing more meaningful feedback on eating quality
- Tackling weed issues across the state: Queensland Weed Symposium
- Cattlemen's Challenge: Clermont event showcases local industry
- UU caterpillar the latest weapon against parkinsonia
- Be informed when drilling for water: important points when considering bore construction
- Managing risks on your property: property biosecurity plan
- Rehabilitation costs put into context: monitoring responses to pasture treatments
- Pasture yield estimation an essential skill for graziers: photo standards

Issue 36 September 2014 (PDF 4 MB)

- Market report: boat, slaughter cattle enjoy surge in prices
- Tips on managing short-term carrying capacity
- Beef Producers Expo for Charters Towers
- Northern cattle prices improve
- Spyglass facility welcomes two new technical officers
- Update on Spyglass nutritional status
- Bring WHS policies to front of graziers' minds
- Urea supplements a cost-effective solution: reduce weight loss across the growing and breeder cattle herd
- Stocktake Plus app a free support tool
- P8's place explained
- Top tips to boost reproduction rates
- Study reveals physical and mental advantages from moderate red meat diet
- MLA project: shorter time to cycle may mean more calves
- Managing profitability in times of drought difficulty: MLA grazing trial coming up with answers to climate challenge
- Deer under Spyglass in Towers pilot study: collars transmit location data to research team
- Technology to help in wild dog control
- Spatial hub at the centre of land-management project
- Digital Homestead project could boost beef dollars: five major outcomes already delivered
- Leucaena varieties show promise at field days
- Stock do deed for seed
- Women of north share business experiences
- NGRMG targets youth to drive sustainable agriculture
- Collaboration works to rehabilitate former mine tailings site
- Team comes to aid with viability services: infrastructure mapping and \$avannaPlan-BeefSense
- Making sense of beef profitability plan
- Chopper hits weed: herbicide pellets rain down on prickly acacia
- PIAG keen to see MLA push northern R&D

Issue 35 September 2014 (PDF 3 MB)

- Meeting the demand for sustainable beef
- Livestock transport code of practice: Queensland aligned with other states
- There's still a cattle overload in NQ
- Satellite hook-up for the bush – new option
- Spyglass keeps eye on pasture quality: NIRS technology in action
- Bucks for Brains incentive available to beef producers
- Supplementation in weaner feeding: total diet on offer needs to be nutritionally balanced
- Feed interruption compromises calf immune systems: post weaning diarrhoea
- Handy guide to farming assistance programs: Bush bible
- Increasing productivity to promote economic viability
- Stocking rate key to establishing pasture mix with Indian couch: Mt Surprise trial varieties demonstrate Psyllid-resistance
- Trials testing prospects for new tropical grasses and legumes
- Industry showcase: crowds approve as beef entries pass the tongue-tip test
- MSA optimization here by Christmas
- Getting down to beef business: high school students enter competition for the first time: Malanda carcass competition
- Dehorning findings: reducing complications after surgery
- DRY gets behind drought-affected producers
- Crunching data to improve property profitability
- PIAG's response to northern beef crisis: recommendations to cut debt and improve farmgate returns
- Graziers learn erosion control to save their soil: grader workshops
- There's light at the end of the tunnel: industry forum gives Gulf beef producers new hope
- Winter webinars keep northern Gulf women informed
- Graziers get message on calving management
- Is bigger always better when it comes to beef businesses and profitability?
- Weeds put on notice: WoWW project targets bad ones
- Gaining a better understanding with DAFF's beef producer survey: vaccination focus

Issue 34 April 2014 (PDF 2.79 MB)

- Feel the burn: woodland strategy 20 years in the making
- Industry input sought for MLA's new fire and grazing management research
- Make sure your documents are ready: considering animal health issues prior to live export
- Planning all part of minimising biosecurity risks on-property
- Home prices firm and live-ex resumes: a round-up of the domestic and international marketplace
- Drought assistance available
- An ongoing pain the grass: Indian couch and its two accomplices, avoiding the slippery slope to their dominance
- The graziers' friend: get real time in-paddock support with new mobile tool
- Workshop and trial participant sought in the north
- Unlocking north's seed secret: results of Hughenden Progardes trial
- Phosphorus supplementation regimes explored in latest research in Gayndah
- Know your stuff: make informed decisions for survival during dry periods
- Improve the viability of your beef business through \$avannaPlan-BeefSense
- Research pioneers on carbon values
- Range of resources at fingertips of northern women
- Splattergun targets weeds at Mount Surprise
- Give your grass a fighting change: control emerging weeds now
- Southern Gulf Catchments Limited
- Students take on the States
- Richmond Beef Challenge yields top results

Issue 33 December 2013 (PDF 2.56 MB)

- A range of research projects in the pipeline: Spyglass Beef Research Facility
- Department officers leave legacy for agricultural industry
- Negotiation checklist: co-existence agreements
- Coming events
- 2013 a harsh year for Qld cattle market: China demand offsets decline in trade to US, Japan, Korea
- LBN leads biosecurity push in Queensland
- Poison hay
- Support is out there for drought affected
- Protect pasture to prevent weeds
- Don't let stress win: revive and thrive is message from Flying Doctors
- Indian couch: the good, the bad and the ugly
- Standards for sustainability: why Grazing BMP is vital for our industry
- Outback kids join NGRMG
- Study of Northern Gulf nature refuges to provide guidelines
- Beef enterprise planning project designed to help producers in Gulf
- Recognising industry's stars: Sarus Crane Award winners 2013
- Landcare group supports graziers with weed spraying
- Sizing up carcasses: Beef Challenge produces fantastic results
- MSA tool assesses impacts on eating quality
- High performing cattle: McKinlay Beef Challenge
- Richmond Beef Challenge
- Thinking BIG on Beetaloo Station
- Findings at Pigeon Hole Station provide answers

Issue 32 September 2013 (PDF 9.42 MB)

- Data flows freely: a world of beef information at your fingertips
- Market report: some relief in sight as rain returns to southern Queensland and NSW
- PCAS a good news story for beef industry
- Coming events
- Under the Spyglass
- Drought aid on offer
- Queensland to benefit from new Farm Finance Package
- MLA guide explains new national transport rules
- Weaner struggle
- Controlling invasive grass species
- Researchers find climate-tolerant fodder
- Scholarships worth \$10,000
- How to grow green
- Climate Clever Beef aims for better practices
- Why nature refuges are important
- Forum for graziers talks management
- Bounce for rubber bush
- Management key to taking heat out of station fire risks
- Taking up challenge: valuable carcase data collected
- Quality of the cuts: seaming cuts give more consistent quality
- Producers get top marks for carcase competition
- Students test skills
- More producers to cash in on MSA changes
- Software for hard facts
- Beef CRC fertility project covers 3500 bulls
- Fertility drives profit
- Tick fever threat: risk increases with bigger cattle movements
- Bull selection season looms
- Advances in AI: what, why
- Bayer joins with breeding centre

Issue 31 April 2013 (PDF 3.11 MB)

- Calotrope spreads in NQ
- Dry or wet – tick fever a threat
- New-look Northern muster
- Helping build the business of beef
- North Queensland women awarded
- Cost control and input issues
- Industry experts cover finance, production, environment
- Market matters: Industry under pressure as fires, now dry season bites
- Strategies show better ways to lift bottom line
- Dealing with the dry
- Carbon farming information tent at FNQ field day
- Gulf country graziers get the lowdown on important rural-related topics
- Rural women show way
- Putting names to faces at Spyglass
- New faces for 2013: Southern Gulf Catchments directors
- SGC projects improve grazing management
- Southern Gulf weed management groups gain funds
- Industry issues in focus:
 - North West Graziers' Forum for Cloncurry
 - Gregory River weed survey – by canoe
 - Drought relief assistance
 - Progardes Desmanthus
- Soils4Grazing sites established
- Graziers in digital age
- Nitrate safety, effectiveness focus of study
- Students, teachers trialling pulses
- Valuable aid in getting pasture balance right
- Positive results from reef run-off survey
- The benefits of ageing beef
- Making breeding more profitable
- Aussie team's strong bid: high placings in US meat judging contests
- Parasite control key to weight gains
- Fixed-time AI saves time, labour and drives profitability
- How to meet 'specs'
- What, when, where
- Rabobank western beef challenges

Issue 30 December 2012 (PDF 2.7 MB)

- Thank you Alan Laing
- Spyglass on show
- Tablelands fertiliser trial
- Market report
- Multimin and weaners
- Improved animal health
- Progeny testing and AI
- Preg testing at Mt Emu
- Herd productivity
- Tick Fever Centre
- Phosphorus options
- Phosphorus manual
- Wet season phosphorus
- Carbon Farming Initiative
- Next Gen Beef Up
- Gulf Kids Environment Day
- Wet season spelling
- Welcome Naomi Hobson
- Stylos great option
- Pasture legumes for clays
- Satellite imagery
- Southern Gulf Catchments
- Soils4Grazing project
- Prickly acacia field day
- Prickly acacia economics
- Using fire
- Fire and currant bush
- Tagging cattle
- Beef Challenges
- Meat Matters
- Upcoming dates
- Grazing BMP
- Applying science at Lisgar
- Prickly acacia biocontrol
- Asbestos grass survey

Issue 29 December 2011 (PDF 2 MB)

- Understanding the MAS grading system
- Making the MSA grade
- Climate watch
- Operation Clean Up helps access fences
- Herbicide residues – who to believe?
- Richmond beef challenge tests new technology
- Market report
- Junior landcare activities
- Staff profile – Emma Hegarty
- Lease renewal process
- Bushfires: silver lining in the smoke
- Grazing industry surveys for reef regions
- Water quality project starts
- Fertilisers, legumes and ReefSafe grazing
- Hendra virus
- Drench resistance in beef weaners
- The Australian Poll Gene test

Issue 28 August 2011 (PDF 1.7 MB)

- Bill Holmes retires
- Burdekin appointments
- Grazing BMP on track
- Beef business training
- Tick fever: assessing the risk
- Rangeland Congress
- Winter rain not good for grass
- Post-Yasi: thinking about fire
- The little fly that could...
- Using vaccines
- Lessons from 1974-78
- Age of male turnoff critical
- Market report
- Reef safe grazing project
- 2011 - a good season but...
- State of the environment
- What's new in landcare?
- Grazing forum in the Gulf
- Barra, Beef and Bulldust
- Bull selection tips
- Phosphorous book updated
- Managing wynn cassia
- Managing sulphur and copper
- Dry season supplements
- Grader grass alert

Issue 27 April 2011 (PDF 3.4 MB)

- Breedcow and Dynama free off the web
- Hormonal growth promotants HGPs
- Review of hormonal growth promotants
- Is 2011 a year for woody plant invasion?
- Breed as a risk factor in tick fever disease?
- Stock theft
- After the cyclone
- Current bush – a prickly and very sneaky problem
- Melioidosis
- Market report
- Boost your profits with good weaner care
- HGPs —where are we now?
- Gulf graziers managing for profit and sustainability
- Resilience of the Gulf Plains
- North West news
- Young Producers Beef Forum
- Big wet, big feed, lower dry season feed quality

Issue 26 December 2010 (PDF 2.7 MB)

- Tick populations boom in northern weather conditions
- Impact of primary production on reef examined in new report
- Perennial grasses are there for the long haul – if you look after them!
- Weed management – making a start, maintaining effort and what is reasonable?
- Charters Towers community unites in weed offensive
- History and technology combine to give NQ graziers an insight into gullies
- To P or not to P
- Northern Gulf flood recovery
- Junior Landcare Kids in the Gulf check out biodiversity!
- Erosion control grader workshops
- Market report
- Siam weed ... an enemy of northern grazing lands
- Plant poisonings on the rise in northern cattle and horses
- Watching the weather
- Worms and meat sheep in the tropics
- What is halal?
- Net carbon position of the Queensland beef industry Dalrymple diary

Issue 25 August 2010 (PDF 4.2 MB)

- Breedcow and Dynama on new computers
- Dalrymple diary
- Market report
- Planned breeding using new technologies
- Understanding the various BREEDPLAN EBVs
- Fertile bulls are a 'must have' to increase your herd's profitability 10
- Measuring breeder performance to improve performance and long term profitability
- Improve your bottom line with selection indexes
- Bull selection decisions with a profit driven focus
- Improving profitable traits using BREEDPLAN
- Worms and meat sheep in the tropics

Issue 24 April 2010 (PDF 3 MB)

- New beefo for north Queensland
- Dalrymple diary
- AgInvest forum
- Market report
- Good rainfall or not, it doesn't pay to overstock
- Using MSA feedback to improve market compliance – NQ experiences
- Is your property registered?
- Bovine Spongiform Encephalopathy (BSE)
- Beef industry – Guidelines for feeding travelling cattle
- End of wet season a good time to vaccinate herd for tick fever
- Protecting your livestock, business and crops during emergencies
- Animal welfare responsibilities at saleyards
- Management manual available for bellyache bush
- Save \$: use NIRS DMD:CP ratio to determine start of urea supplementation
- How MLA is marketing red meat

Issue 23 December 2009 (PDF 2.9 MB)

- Your essential guide to animal health
- Link cattle numbers to grass supply
- Dalrymple diary
- FutureBeef – helping you grow a more successful beef business
- Phosphorus intake observations – 2008/2009 wet season
- Market report – November 2009
- The final tail
- Sulphur in supplements
- Tick fever in northern Australia – reassessing the risk
- Beef jerky
- El Niño pattern persists

Issue 22 August 2009 (PDF 1.4 MB)

- ABARE beef report
- Million-dollar offensive to kill invasive weed
- A pointed collection
- Bucks for brains
- Market report – July 2009
- Perennial grasses: the key to profitable cattle production
- Dalrymple diary
- Healthy grazing country booklet helps graziers
- Legal advice services
- Australian animal welfare standards and guidelines – Land transport of livestock
- Beef industry snapshot
- Cattle transport – Loading strategies for road transport
- Stock feed audit essential in fight against disease
- Beef Australia 2009 an outstanding success
- Bovine ephemeral fever – is it changing?
- Many cattle in north-west Queensland are not getting enough energy or protein from the feed that is growing after this year's floods
- Bull selection time
- Protein meals in molasses-based supplements
- Lisgar field day
- \$5.6 million available in Reef Rescue funding

Issue 21 April 2009 (PDF 1.9 MB)

- Different urea percentage in dry licks
- Better decisions in the Business of Beef workshop July 2009
- One-on-one technical assistance at Beef 2009
- Sustainable tree stocking rates increase overall productivity
- Market report – March 2009
- Beef supply chain costs
- Weed menace: Grader grass guide for northern graziers
- Management manual to help fight against bellyache bush
- Dalrymple diary
- Caught in the web
- AgInvest forum 2009 – profiling agribusiness opportunities in North Queensland
- 'Better Decisions' training now registered for FarmReady grants
- Land types of Queensland free CD
- Save \$: use NIRS DMD:CP ratio to determine start of urea supplementation

Issue 20 December 2008 (PDF 1.3 MB)

- Changes to drought assistance from 1 November
- Neutral ENSO conditions
- Dalrymple diary
- Stock handling guidelines at saleyards
- Dehorning best practice
- Poll gene research
- Sulphur in supplements
- Working with producers to achieve MSA premiums
- Precision beef cattle production through an alternative genetic approach
- Are your stock up to the challenge of vaccination?
- Breedcow and Dynama Software – updates or new
- Phosphorus – get intakes right!
- Don't rely on a good wet to get you out of trouble
- Are your bulls fertile?
- Where's the grass boss?
- Market report – November 2008
- Fertiliser use is still essential for beef production
- Embrace NLIS for management
- Exciting study opportunities with Rangelands Australia

Issue 19 September 2008 (PDF 1.8 MB)

- Antibiotic residue threat in calves prompts warning to local cattle owners
- Neutral ENSO conditions
- Dalrymple diary
- How do you make decisions about managing your property?
- Botulism on the block
- To V or not to V?
- Post weaning diarrhoea
- Exciting study opportunities with Rangelands Australia
- Research to Reality – Beef extension innovation for the Burdekin Catchment
- Flying robots can help improve farm management

- New DPI&F hybrids yields a-mazing results for Tablelands
- Dalrymple dairy
- Big head in horses
- Molasses based supplements for horses
- Sulphur – too little or too much?
- Molasses based supplements for weaners

Issue 16 July 2007 (PDF 1.4 MB)

- New cattle budgeting software now available for beef producers
- Grazing best practice management key to catchment health
- Beef Futures Forums in Normanton and Georgetown
- Northern Gulf Ecobeef update
- Market report
- Climate outlook
- The Wambiana Field Day
- Livestock owners to get increased \$ rebates for NLIS scanners
- NQ hobby-farmers reminded of livestock registration obligations
- NLIS cattle
- Innovation grants set to bring NLIS tag prices down
- Dalrymple diary
- *Chromolaena odorata* – Siam weed
- *Miconia calvescens* – the purple plague!
- Sorghum, maize and pulses science leader appointed
- Students assist in unlocking the secrets to why cattle graze on poisonous gidgee
- Poisonous plants risk to stock after rain and cold
- Study begins into the Burdekin to Brisbane pipeline
- AgForward
- DPI&F FutureCane tour promotes modern farm practises
- Value in Beef in NQ

Issue 15 March 2007 (PDF 1.5 MB)

- Wild rivers
- Production feeding field day at Kairi
- Climate outlook
- The Gulf Fire project results after five years
- NLIS sheep identification necessary for NSW and Vic sheep moving to Queensland
- National Vendor Declaration – 10 years on and still crucial
- Market Report
- Tick fever – beware the breed!
- Dalrymple dairy
- Plain English guide to native vegetation clearing now available
- *Miconia calvescens* – the purple plague!
- Burdekin region volunteers keep an eye on the 'Big Wet'
- Tablelands industry forum an asset for Agribusiness
- DPI&F helps producers to be better armed for future cyclones
- Take care when purchasing alternative feeds during drought
- Producers need to comply with drought assistance restocking credits
- DPI&F launches online database for rural workforce training
- DPI&F facilitates global interest in Tablelands business
- Breedcow and Dynama software training
- The ecology of grader grass in the spotlight
- Do you need tools and information to better manage your property and vegetation?
- Value in beef project for northern beef producers
