

CARBON LINK IN CONJUNCTION WITH RCS PRESENTS

# The Soil Carbon Trading Roadshow

Get the dirt on putting soil carbon on your bottom line – without locking up your land (*and learn how you'll lead the world in the process*).

## WITH SPECIAL GUEST SPEAKERS:

**Dr Terry McCosker**  
Carbon Link

Terry has been an innovator in Australian grazing industries for almost 50 years. His work in agricultural research has led to many world first achievements, and he is well known for bringing numerous

innovations to grazing industries through his role in RCS. Terry is forging in-roads into the world of carbon trading, paving the way for graziers to realise significant financial gains through soil carbon projects whilst running productive and sustainable grazing enterprises.

**Dr David C. Johnson**  
New Mexico State University

A research scientist for the New Mexico State University's Institute of Sustainable Agricultural Research, Dr Johnson's work includes examining how to best capture atmospheric CO<sub>2</sub> and sequester it into the soil whilst also

improving agricultural systems. His research on the Biologically Enhanced Agricultural Management (BEAM) approach has shown that a shift to a fungal dominant soil can lead to a dramatic increase in the rate of soil carbon sequestration, in addition to significantly greater biomass production.

## TOPICS COVERED WILL INCLUDE:

- ➔ Results from farmers who are already doing soil carbon contracts (yes, it is here and it *is* real!)
- ➔ What is a soil carbon project worth to farmers?
- ➔ What is involved in a soil carbon project?
- ➔ The carbon cycle and sequestering carbon
- ➔ Fungi and their role in sequestration
- ➔ Making your own fungal dominant compost
- ➔ The Biologically Enhanced Agricultural Management (BEAM) approach and its benefits
- ➔ How do farmers make it happen?
- ➔ Carbon trading
- ➔ Managing the risks involved
- ➔ Question and answer time with the world leading experts on soil carbon projects.

**COST:**  
**\$55<sup>PP</sup>** incl GST  
 including lunch  
 & afternoon tea

## VISITING:

<b>Blackwater</b> .....	6th December
<b>Biloela</b> .....	7th December
<b>Miles</b> .....	8th December
<b>Goondiwindi</b> .....	9th December
<b>Armidale</b> .....	10th December
<b>Gunnedah</b> .....	12th December
<b>Dubbo</b> .....	13th December
<b>Cowra</b> .....	14th December

Seminars commence at 12.00pm with a light lunch, and conclude at 4.30pm.
